

FlexPay™ B2B

Stylish, double sided cash and card payment terminal that fits all forecourt layouts for attended and unattended sites.

Introducing the retail petroleum industry's first double sided multi-featured EMV Outdoor Payment Terminal (OPT), the FlexPay™ B2B provides all the efficiencies of traditional CRIND's with the functionality of OPT's.

The FlexPay™ B2B is designed for supporting attended or unattended sites, allowing customers to operate 24 hours a day and within unattended forecourts.

It features an optimised footprint which ensures it can fit into any forecourt and lane orientation. In addition it has a familiar ATM-styling for speedy transactions along with multiple payment types.

The FlexPay™ B2B is designed to deliver more revenue on the forecourt.

Features and benefits

Double Sided

The unique design can fit any forecourt configuration and automation model requirement.

Multiple Payment Types

No matter what the payment methods are, FlexPay™ B2B can handle them: Cards, banknotes, contactless, tagging, barcode vouchers or coupons.

Modern Design, ATM Styled

The enhanced user experience will distinguish your forecourt from others. Through its modern eye-catching look and its ATM style interface, the user will be familiar with its operations.

24hr Unattended

Thanks to its dedicated accessories, FlexPay™ B2B is the perfect tool to operate 24 hour unattended sites, as well as accepting banknotes. Thanks to the:

- > integration with video surveillance,
- > electronic locks with remotely enabled one time disposable codes
- > tamper evident exchangeable money bags, this enables easy outsourcing of money collection to third party security companies.

Optimised Footprint

Designed to fit into narrow or difficult areas, next to the pump, or other locations on the forecourt. The FlexPay™ B2B utilises the same fixing points of Logitron Pumacard and SPOT OPT, avoiding heavy specialist labour.

Each fuelling position has its dedicated pay point.

Each lane has a nearby pay point.

Easy Maintenance

Whether a paper roll change, an engineer check-up or a 3rd party money collection. The intelligent design allows for easy maintenance access with entry access to all sides.

Large set of options

FlexPay™ B2B is flexible and scalable. By adding optional components it covers both current needs and future expectations. It integrates a manual or motorised card reader, active anti-skimming, barcode scanner, contactless reader and branding.

Secure

Integrates seamlessly with burglary prevention and video surveillance.

Upgrade from Logitron PumaCard OPT or SPOT OPT

Thanks to basement compatibility, it is simple to upgrade existing Gilbarco Veeder-Root (or Logitron) terminals, allowing reuse of the existing plinth. The OPT can be installed to fit any lane configuration regardless of the existing layout.

Easy Integration

Enjoy fast and efficient product deployments with your site automation systems. The FlexPay™ B2B works with all Gilbarco Veeder-Root POS and site controllers.

Superior Design and Components

Technical specifications	
Payment platform	<ul style="list-style-type: none"> > Based on Gilbarco Veeder-Root SPOT proprietary platforms <ul style="list-style-type: none"> > Graphic colour LCD with 8 function keys > Manual or motorised hybrid card reader (anti-skimming option) > 15 keys vandal proof metal keypad > Certifications: PCI PED (POS-A), EMV Level 1 & 2, several National banks > Thermal graphic printer, with nearend-of-paper and end-of-paper sensors, with dedicate access door > Easy maintenance with access on all sides > Native PIN privacy shield > Banknotes acceptance (option), with many 24h unattended further options > Contactless reader (option) > Barcode reader (option) > LED spotlights (option)
