

Adaptable and
Convenient

Modern
Design

FlexPay™ NC3L

The next generation CRIND capable of transforming the SK700-II N pumps into powerful multidimensional profit centre.

> Gilbarco Veeder-Root's new FlexPay™ NC3L CRIND is designed to integrate seamlessly with the SK700-II N dispenser.

Pay @ Pump allows customers to pay for their purchases at the pump with a credit or debit card, making your forecourt flow faster.

> Providing easy and fast customer guidance, the NC3L has a familiar navigation through the payment and refuelling sequence, enhancing customer experience.

The FlexPay™ NC3L drives loyalty by communicating with customers through promotions, couponing and branding on screen as they refuel.

> The advanced modularity of the FlexPay™ NC3L allows integration with a wide range of dispensers.

This can then be extended with a smooth and easy integration with Gilbarco Veeder-Root's POS or with any other systems integrator's automation solution.

Features and benefits

Designed to attract and excite

The 12" screen will be the star in the forecourt, vibrantly projecting your advertising or promotional campaign.

Multimedia features and security marriage

Incorporating Gilbarco Veeder-Root SPOT M4 payment platform anything is possible including large format advertising, free video and audio streaming and touch screen.

Modern design

Nordic design, seamlessly integrated with the dispenser and differentiates the forecourt from others.

Integrates with 3rd party dispensers

Designed to be retrofitted onto other manufacturer's dispensers.

Easy to service

No matter if it's a paper roll change, an engineer check-up or a 3rd party money collection. There is easy maintenance access via front panels.
